Through Bass Tool & Supply, Silver Star Tool provides solutions for custom cutting tools whether it be flat bottom drills or special radius end mills. We can alter standard off-the-shelf cutters or manufacture a special from a blank. We also manufacture multi-step port cutters and angle stools. We provide TiN, TiCN, and AlTiN coatings.

Bass Tool & Supply can provide a turn key tool resharpener program using integrated supply chain solutions to reduce your activities and cost in your toolroom. These solutions include packaging and labeling, inventory reporting and overall process control. We will provide scheduled pickup and delivery at no additional cost.

SilverStar Tool uses seven axis CNC Tool & Cutter Grinders assuring consistent quality throughout the tool sharpening process. We can sharpen industrial cutting tools such as high performance drills, end mills, ball nose end mills, vari-pitch end mills, taper end mills and radius end mills in Carbide, HSS and HSCO.
