BUY 10
SAVE 10%

Promo Code: 2025ACLUB10OFF

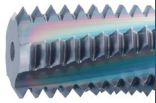

Promotion Details:

Must purchase a minimum of 10 qualifying A Brand A-Taps. Must be on a single order, may include 10 matching edp numbers or any combination of qualifying sizes or products. For a limited time only. Limitations and exclusions may apply. Promotion restricted to drop ship orders only, EDI orders excluded.

A Brand A-Taps

OSG's Advance Performance Tap Lineup

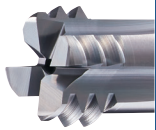

A Brand AT-1

The A Brand AT-1 threadmill is designed with a left-hand helix for a small pitch diameter difference between the hole entry and the bottom of the hole, allowing a delay in gauge-out failure.

A Brand A-CSF & A-CHT

A-CSF and A-CHT offer an ultra-fine grain carbide substrate and a unique flute geometry which excels in cast iron and non-ferrous materials. The coolant hole design allows 1.3 times more coolant flow.

A Brand AT-2

The AT-2 Thread mills with end-cutting edge is ideal for highly difficult high hardness steel applications. Since no pilot hole is required, process integration and the risk of breakage can be avoided.

A Brand A-SFT & A-POT

The spiral flute A-SFT & the spiral point A-POT are all-purpose taps designed to excel in a wide variety of materials.

A Brand AT-2 R-Spec

The AT-2 R-SPEC is engineered to drastically reduce machining time in non-ferrous applications by its continuous helical cutting ability, which combines drilling and threading into a single process.

A Brand A-Pipe Series

With an expansive size offering, the new A-Pipe Tap has enhanced cutting geometry with proprietary V Coating for extended tool life that performs exceptionally in a wide range of materials.

A Brand A-XPF

A Brand A-XPF forms threads by deformation of the work material and does not generate cutting chips resolving tapping troubles that are caused by unstable chip evacuation.
